Sysslan IT Solutions

Internship Cohort

Java Development Task List

About Us

Sysslan IT Solutions

- Sysslan IT Solutions is a leading technology firm recognized for its proficiency in the rapidly evolving domains of cloud computing, blockchain, artificial intelligence (AI), and machine learning (ML).

- The company is dedicated to delivering high-impact projects and customized solutions that address the dynamic requirements of modern businesses.

- Sysslan IT Solutions provides a comprehensive range of products and services, including scalable cloud computing platforms, cutting-edge blockchain solutions, intelligent AI systems, and advanced ML algorithms, designed to empower organizations and drive innovation.

Instructions

Sysslan IT Solutions

- Update your LinkedIn profile to highlight your accomplishments, such as offer letters or internship certificates from Sysslan IT Solutions. Mention and tag Sysslan IT Solutions in your posts. Use relevant hashtags like #SysslanITSolutions #SysslanExperience #FutureWithSysslan to showcase your professional association.

- Ensure that all work is original and avoid plagiarism or code duplication, as such violations may result in termination of the internship and impact future opportunities with Sysslan IT Solutions.

- Create a video presentation of your completed tasks and share it on LinkedIn. Tag Sysslan IT Solutions and use hashtags like #SysslanInnovation #SysslanITSolutions #SysslanProjects to engage with our professional community.

Sysslan IT Solutions

SUBMISSION

- Create a professional video highlighting your internship projects and accomplishments.

- Share the video on LinkedIn to demonstrate your work and build credibility with your professional network. Make sure to tag Sysslan IT Solutions in your post so the company is notified of your achievements.

- A submission form will be provided later. In the meantime, continue working on your tasks and maintain separate files for each level of work.

- When posting the video on LinkedIn, use the following hashtags to increase visibility and engagement:
- #SysslanITSolutions #Sysslan #SysslanProjects

- You can also include additional hashtags relevant to your specific internship domain to further showcase your expertise.

Sysslan IT Solutions

Title: Java Programming and Automation Internship

Project Overview:

This internship project is designed to provide hands-on experience in Java programming, progressing from core fundamentals to real-world beginner–professional applications. The tasks focus on building logical thinking, object-oriented programming skills, file handling, automation, and practical utilities commonly expected from entry-level Java developers.

Key Objectives:

- Strengthen Core Java fundamentals
- Practice object-oriented programming (OOP)
- Learn file handling and data persistence
- Build small real-world Java utilities
- Develop problem-solving and clean coding habits

Sysslan IT Solutions

Level 1 – Core Java Fundamentals

(Understanding syntax, loops, conditionals, and arrays)

Description:
This level builds a strong foundation in Java syntax and logic using arrays, conditions, and user input.

Tasks:

- Task 1: Display a 3×3 number grid using arrays and check if a number exists
- Task 2: Create a temperature converter (Celsius ↔ Fahrenheit)
- Task 3: Calculate student grade averages using arrays
- Task 4: Generate a secure random password based on user preferences

Skills Gained:
Java basics, arrays, loops, conditionals, user input handling

Sysslan IT Solutions

Level 2 – Intermediate Java Utilities
(File handling, validation, and console-based games)

Description:
This level introduces interactive programs, validation logic, and simple file-based utilities.

Tasks:

- Task 1: Develop a two-player console Tic-Tac-Toe game
- Task 2: Analyze password strength using validation rules
- Task 3: Encrypt and decrypt text files using basic algorithms
- Task 4: Build a personal expense tracker with file storage

Skills Gained:
Validation logic, console interaction, file handling, basic algorithms

Sysslan IT Solutions

Level 3 – OOP & Small Projects
(Object-oriented design and persistent storage)

Description:
This level focuses on object-oriented programming concepts and structured application design.

Tasks:

- Task 1: Contact management system using classes and ArrayLists
- Task 2: Student record system with file-based persistence
- Task 3: Console-based library management system
- Task 4: Timestamped log file generator

Skills Gained:
OOP principles, classes & objects, collections, file persistence

Sysslan IT Solutions

Level 4 – Real-World Beginner Projects (Automation, reporting, and data handling)

Description:
This level simulates real-world Java use cases involving automation and structured data.

Tasks:

- Task 1: Automated file organizer by file type
- Task 2: Daily task manager with load/save functionality
- Task 3: Student report generator with formatted output
- Task 4: CSV data processor for summaries and analytics

Skills Gained:
Automation, CSV handling, reporting, structured data processing

Sysslan IT Solutions

Level 5 – Advanced Beginner / Professional Projects (Mini real-world Java applications)

Description:

This level introduces professional-style Java projects that combine multiple features and libraries.

Tasks:

- Task 1: Web scraping using JSoup
- Task 2: Automated folder backup tool
- Task 3: CSV-based inventory management system
- Task 4: Personal utility project combining file handling and data processing

Skills Gained:

Web scraping, error handling, multi-feature applications, clean console output
